

The Industrial Advisory Council

BRINGING TOGETHER EDUCATION AND INDUSTRY

The Industrial Advisory Council acts as a liaison for Engineering and Engineering Technology educational collaborations between Penn State Berks and business and industry in the Greater Berks area. Supporting various Engineering and Engineering Technology educational programs and activities of Penn State Berks, members provide on-going assessment and input regarding new and existing Engineering and Engineering Technology programs, courses, and delivery methods, including industry trends and advances in technology.

Benefits of Involvement:

- Identifying talent for future employment and internships
- Opportunity to work with students to develop fresh, innovative solutions to industry problems through the Berks Learning Factory
- Business exposure and marketing
- Networking with other industry members
- Two professional development hours (PDH's) per year
- Personal reward of helping future engineers of industry
